### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. The application has been amended as follows: This application is in condition for allowance except for the presence of claims 25-31 directed to an invention non-elected without traverse. Accordingly, claims 25-31 have been cancelled.
3. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or fairly teach varying the sensor path across the substrate by rotating the substrate carrier at a rotation rate different than the rotation rate of the polishing pad. The closest prior art, US2001/0036793A1 to Wiswesser et al and US 2004/0152396A1 to Wiswesser et al, teach varying the sensor path across the substrate by reciprocating the substrate carrier across the pad. While both devices are capable of providing different rotation rates for the pad and carrier, both are clear that the sensor path depends on reciprocation of the carrier.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
